

Introducing the new hanger bar system for Ultra Silent™ Ventilation Fans. What took three hands now takes two.

Fast. Preassembled hanger bars save time and money.

Accurate. Bottom locator tabs position the housing perfectly every time.

Easy. Captive fasteners are ready to drive into place.

Just what you'd expect from the leader in residential ventilation.

- Hanger bar system is fast flexible and easy for all types of construction.
- Captive fasteners keep nails in place—no handling needed.
- Instantly set the correct mounting height and level the housing between joists with integral bottom locator tabs.
- Infinitely adjust the fan housing between joists from a span of 16" to 24" with hanger bars.
- No additional framing is needed. The fan easily mounts on all types of construction: standard joist, I-joist, and truss construction. Mount to either the bottom or side of the joist.
- Two sets of mounting holes facilitate flush installation with either the bottom or top of the drywall.
