

CONCEAL-A-STAT™

Flush-Mounted, Tamper-Proof, 24 Volt Thermostat

Conceal-A-Stat™ is designed to control unit heaters, fan coil units, cabinet heaters, in the wall heaters or air conditioning units. Common applications include locker rooms, entryways, hallways, and warehouses.

Features

- Stainless steel, flush-mounted wall plate
- Mounts on a standard 2" x 4" electrical box
- Thermostat is preset to specified temperature
- Thermostat rated at 24 VAC / 1.0 A

Available Temperatures

- CS-41-WP 41°F (heating application)
- CS-60-WP 60°F (heating application)
- CS-65-WP 65°F (heating application)
- CS-70-WP 70°F (heating application)
- CS-AC-70-WP 70°F (cooling application)
- CS-AC-75-WP 75°F (cooling application)

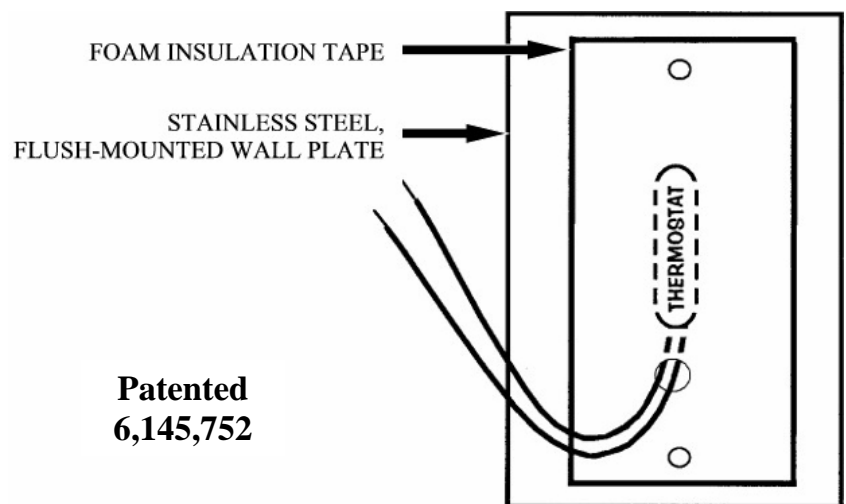

Transformer relay kits are available for line voltage control circuits

- CS-RY-115 (required for 115 volt control circuits)
- CS-RY-220 (required for 220 volt control circuits)

Note:

It is recommended that a piece of fiberglass insulation be placed inside the electrical box to further decrease the influence of a cold wall.
