

INSTRUCTIONS FOR REPLACEMENT FOR GE GXRTQR INLINE FILTER

GE HAS DISCONTINUED THE GXRTQR FILTER AND REPLACED IT WITH THE GXRTDR, WHICH HAS “QUICK CONNECT” FITTINGS.

TO CONTINUE USING YOUR EXISTING PLUMBING CONNECTIONS – FOLLOW THESE INSTRUCTIONS:

- 1). Remove blue caps from the end of the filter, prying away with a flathead screwdriver
- 2). Wrap threads of fittings with included Teflon tape. Place the end of the tape on the second thread in and hold it in place with one hand. Wrap the tape in the same direction of the threads. Keep tension on the tape and wrap it several times working away from the end of the fitting
- 3). Screw the wrapped fittings into the ends of the filters and tighten
- 4). Connect filter to water supply line
