

**ENGINEERING DATA**

MERV 10 and MERV 16 Filters

MERV 10 and MERV 16 Expandable Filter Kits (MERV 16 Shown)

Filter Cabinet (With Filter in Place)

**MODEL NUMBER IDENTIFICATION**

**HC10 (MERV 10)**

consists of:

**(cabinet + box filter)**

- HCC14-23 (Cabinet) + HCF14-10 (Filter) 1400 cfm
- HCC16-28 (Cabinet) + HCF16-10 (Filter) 1600 cfm
- HCC20-28 (Cabinet) + HCF20-10 (Filter) 2000 cfm

**(cabinet + expandable filter kit)**

- HCC14-23 (Cabinet) + HCXF14-10 (Expandable Filter) 1400 cfm
- HCC16-28 (Cabinet) + HCXF16-10 (Expandable Filter) 1600 cfm
- HCC20-28 (Cabinet) + HCXF20-10 (Expandable Filter) 2000 cfm

**HC16 (MERV 16)**

consists of:

**(cabinet + box filter)**

- HCC14-23 (Cabinet) + HCF14-16 (Filter) 1400 cfm
- HCC16-28 (Cabinet) + HCF16-16 (Filter) 1600 cfm
- HCC20-28 (Cabinet) + HCF20-16 (Filter) 2000 cfm

**(cabinet + expandable filter kit)**

- HCC14-23 (Cabinet) + HCXF14-16 (Expandable Filter) 1400 cfm
- HCC16-28 (Cabinet) + HCXF16-16 (Expandable Filter) 1600 cfm
- HCC20-28 (Cabinet) + HCXF20-16 (Expandable Filter) 2000 cfm

**CABINET**

**HCC 16 - 28**

**Unit Type**  
HCC = Healthy Climate Cabinet

**Nominal Air Volume Capacity**  
14 = 1400 cfm  
16 = 1600 cfm  
20 = 2000 cfm

**Cabinet Depth**  
23 = 23 inches  
28 = 28 inches

**BOX FILTER**

**HCF 16 - 10**

**Filter Efficiency**  
10 = <sup>1</sup> MERV 10  
16 = <sup>1</sup> MERV 16

**Nominal Air Volume Capacity**  
14 = 1400 cfm  
16 = 1600 cfm  
20 = 2000 cfm

**Healthy Climate Filter**

<sup>1</sup> Minimum Efficiency Reporting Value

**EXPANDABLE FILTER KIT**

**HCXF 16 - 10**

**Filter Efficiency**  
10 = <sup>1</sup> MERV 10  
16 = <sup>1</sup> MERV 16

**Nominal Air Volume Capacity**  
14 = 1400 cfm  
16 = 1600 cfm  
20 = 2000 cfm

**Healthy Climate Expandable Filter**

<sup>1</sup> Minimum Efficiency Reporting Value

## FEATURES

### APPLICATIONS

**NOTE - Cabinet and Filter must be ordered separately.**

MERV 10 and MERV 16 filters (Minimum Efficiency Reporting Value based on ASHRAE 52.2).

High performance filtration with a narrow 7 in. cabinet.

Pleated filter design allows maximum air flow and filtration efficiency.

- Multi-position cabinet is available for installation on the return air opening of gas, oil or electric forced, warm air furnaces and air handlers with cooling applications up to 5 tons. The unit can be installed in up-flow, down-flow or horizontal unit applications.

- Silent operation, requires no electrical component service, and generates no ozone.

- Constant blower operation will achieve the best air cleaning results.

- No duct transition needed for most furnace applications.

See Match-Up Table for additional details on page 5.

### WARRANTY

HCC cabinet and HCXF reusable filter box has a five year limited warranty in residential applications, one year in non-residential applications.

Filter media is not covered.

Refer to Healthy Climate Equipment Limited Warranty certificate included with cabinet for specific details.

### INSTALLATION CONSIDERATIONS

A 25 in. clearance in front of the air cleaner is required to allow removal of filter media.

Due to the flue location on down-flow furnaces, the front of the air cleaner must be installed to the side or rear of the furnace cabinet. If installed in a confined space, service clearance may be restricted.

If an atomizing spray type humidifier is also used, it must be installed downstream from the air cleaner.

If a UV germicidal light is used in the system, maintain a minimum distance of 6 ft. from the air cleaner if they are in direct line of sight to one another. Maintain a minimum of 3 ft. if using a 90° bend or turn in the duct.

### CABINET

Constructed of pre-painted cold rolled steel.

Cabinet will withstand 400 lbs. static weight, enough to support the weight of a typical furnace and indoor coil or air handler.

Tool-less access door allows quick and easy replacement of filter media.

Mounts in any position. Air flow direction through the cabinet can be changed by re-positioning the filter. Arrows on filter indicate air flow direction.

Cabinet is shipped compact and requires minimum field assembly. No tools required.

### FILTER MEDIA

Disposable, pleated MERV 10 and MERV 16 filter (Minimum Efficiency Reporting Value based on ASHRAE 52.2).

Dust mites, pollen, mold spores, pet dander and other contaminants are captured by the filter.

Media is certified to UL 900 standard and UL/ULC classification - Class 2.

Recommended replacement of filter media depends on a variety of factors, see Specifications table.

#### Box Filters

Double-wall beverage board box for rigid construction.

#### Expandable Filter Kits

Filter kit is shipped compact for field assembly.

All kits consist of an expandable filter media and reusable filter box.

MERV 16 kits also include reusable filter spacers.

2000	Not recommended				0.27	0.31

## MINIMUM FILTER EFFICIENCY

Filter Model No.	MERV Rating	<sup>1</sup> Filter Efficiency (percentage)		
		E1 (0.3 to 1.0 microns)	E2 (1.0 to 3.0 microns)	E3 (3.0 to 10.0 microns)
HCF14-10 / HCXF14-10 HCF16-10 / HCXF16-10 HCF20-10 / HCXF20-10	10	30%	69%	90%
HCF14-16 / HCXF14-16 HCF16-16 / HCXF16-16 HCF20-16 / HCXF20-16	16	95%	99%	99%

<sup>1</sup> Values are based on lab tests conducted with conditions included in ASHRAE Standard 52.2 1999.

## TYPICAL APPLICATIONS

### UP-FLOW FURNACE / AIR HANDLER (Bottom Return Air)

Filter Cabinet is installed horizontally beneath the furnace/air handler. Return air enters from the bottom.

### UP-FLOW FURNACE (Side Return Air) Up to 4 ton

Filter Cabinet is installed vertically and return air enters the furnace side inlet (up to 4 ton application).

### UP-FLOW FURNACE (Side Return Air) 5 ton applications

Filter Cabinet is installed vertically and return air enters the furnace side inlet (5 ton application).  
Return Air Base (RAB) is ordered separately

### DOWN-FLOW<sup>1</sup> FURNACE / AIR HANDLER

Filter Cabinet is installed horizontally in the return air duct just above the furnace/air handler.  
<sup>1</sup> Down-Flow furnaces require field fabricated transition in-between furnace and filter box.

### HORIZONTAL FURNACE / AIR HANDLER

Filter Cabinet is installed vertically in the return air duct near the furnace/air handler.

## MATCH-UPS - FILTER CABINET WITH FURNACE / AIR HANDLER
