

High Efficiency Antimicrobial Postfilter for Electronic Air Cleaners

Add a Honeywell High Efficiency Postfilter to your Honeywell Whole-house Air Cleaner and capture even more of the particles making your home's environment uncomfortable.

Allergens, pollen, mold spores, bacteria, dust and other microscopic particles are captured by the antimicrobial postfilter within the air cleaner — before they reach the air you and your family breathe.

The Honeywell High Efficiency Postfilter features patented filtration technology that improves filtration efficiency without reducing the air flow through your air cleaner, minimizing the strain put on your central air system.

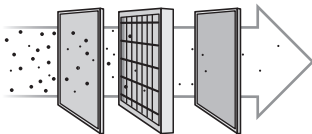

High Efficiency Postfilter

Make Honeywell's Electronic Cleaners Even Better.

Capture up to 98% of particles between 3 and 10 microns in size – cat dander, pollen and dust.

Filtration 3
Three-stage filtration includes exclusive electrostatic postfilter that improves efficiency with minimal resistance to airflow.

Antimicrobial coating protects against bacteria and fungal growth on the filter.

Enhance your air cleaner's filtration efficiency in capturing bacteria, smoke, particles, mold spores and other fungi.

Lasts up to six months.

The American Lung Association and its Health House program do not endorse products.
