Part Numbers and Accessories

Purchase a Networked Zoning Kit (2 or 3 zones) packaged with all VisionPRO IAQ thermostats or a combination of VisionPRO IAQ and FocusPRO thermostats to get both zoning and IAQ control. Thermostats can also be purchased separately for use with existing Networked Zoning Panels. See below for a complete list of part numbers, accessories and system enhancements.

Networked Zoning Systems with VisionPRO IAQ:

Part Numbers	Description
Y8835A1044	2-Zone Networked Zoning Kit: Zone Panel and 2 VisionPRO IAQ Thermostats
Y8835A1028	3-Zone Networked Zoning Kit: Zone Panel and 3 VisionPRO IAQ Thermostats
Y8835A1036	2-Zone Networked Zoning Kit: Zone Panel, 1 VisionPRO IAQ Thermostat and 1 FocusPRO Communicating Thermostat
Y8835A1051	3-Zone Networked Zoning Kit: Zone panel, 1 VisionPRO IAQ Thermostat and 2 FocusPRO Communicating Thermostat
W8835A1004	EnviraZone (3H/2C) Networked Zone Panel
TH9421C1004	VisionPRO IAQ (3H/2C) Thermostat
TH5320C1002	FocusPRO (3H/2C) Communicating Thermostat

Networked Zoning Accessories:

Part Numbers	Description
W8703A1003	EnviraCom Damper Interface Module (Expands W8835A1004 up to 9 Zones)
C7835A1009	EnviraCom Discharge Air Temperature Sensor
C7089U1006	Outdoor Sensor (50022037 required for use with W8835 panel)
50022037	Outdoor Sensor Interface Module (required when using C7089 temperature sensor with W8835 panel)
W8735A1005	EnviraCom Serial Adapter

System Enhancements:

Part Numbers	Description
W8735D1017	4-Channel Telephone Access Module - April 2007
W8735D1009	2-Channel Telephone access module - April 2007
HE225A/B	Bypass Flow-Through Whole-House Humidifier
HE365A/B	Fan Powered Flow-Through Whole House Humidifier
HE420A1005	Steam Powered Whole-House Humidifier
DH90	Whole-House Dehumidifier with Integrated Ventilation Control
ER150/200	Energy Recovery Ventilator
HR150/200	Heat Recovery Ventilator
EARD6	Fresh Air Damper
UV100E2009	UV Air Treatment with Smart Lamp Technology
UV100E3007	UV Air Treatment with Smart Lamp Technology
F300	Whole-House Electronic Air Cleaner

Networked Zoning

Total Home Comfort System

Control comfort, Indoor Air Quality (IAQ) and Zoning with Honeywell's Networked Zoning Total Home Comfort System featuring the VisionPRO® IAQ thermostat. Networked Zoning with VisionPRO IAQ allows you to provide control of temperature, humidification, dehumidification, ventilation, air filtration and zoning all from an effortless, touchscreen control in Zone 1. Plus, Honeywell gives you the choice of using additional VisionPRO IAQ or FocusPRO non-programmable thermostats in other zones.

Here's How it Works

Connect thermostats (VisionPRO IAQ required for Zone 1 IAQ control) to the Envirazone Networked Zoning Panel (shown below) with a simple, 3-wire bundle. Then wire heating and cooling equipment, IAQ system enhancements and zone dampers to the panel—positioned by the equipment. Smart installer setup options allow you to customize thermostats to meet the needs of every installation.

Everything you love about VisionPRO — Touchscreen, menu-driven programming, precise comfort control (+/-1° F), and a 5-Year Warranty.

Self-Configuring Thermostats — Simply assign the zone number to each thermostat and the system does the rest.

Networked Settings — Update one thermostat (time, vacation mode) and all thermostats throughout the home will update automatically.

3-Wire Communication — Only 3 wires from the Thermostat to the Zone Panel.

Smart Change/Check Reminders — Let customers know when to service or replace batteries, filters, UV bulbs (based on actual usage) and humidifier pads.

Zone Control Options — Give you the choice of using FocusPRO non-programmable thermostats in other zones (VisionPRO IAQ required on Zone 1 for IAQ control).

Make More Money — Use VisionPRO IAQ as a way to sell more Indoor Air Quality. Customers can add system enhancements upfront, or choose to upgrade later. Either way, the control is wired, and ready to go.

Zone of Greatest Demand — Reduces system loads by coordinating calls for heat and cool by zone.

Universal Application — Works with almost every brand heating/cooling equipment up to 3 Heat/2 Cool Conventional and Heat Pump, and any 2 or 3-wire dampers.

LED Indicators — Inform installer of messages being received and potential problems with operation.

Solid-State Relays — Reliably switch the equipment on and off.

Outdoor Temperture Sensor— Wires to zoning panel and displays outdoor temperature on VisionPRO IAQ.

Supports Discharge Air Temperature Sensing — Control capacity with adjustable high/low limits and equipment failure indication.

Controls Humidification — Terminals allow you to wire and control bypass, flow-through or steam humidifiers.

Controls Dehumidification — Terminals allow you to wire and control a whole-house dehumidifier.

Controls Ventilation — Terminals allow for wiring and control of HRVs, ERVs or Fresh-Air Dampers to provide ventilation or meet ventilation codes.
