Customer Warranty: All Other Parts - One (1) Year

While testing was performed under standard laboratory conditions, actual performance data may vary.

If no water is dispensed when the refrigerator is first installed, there may be air in the water line system. Press the dispenser arm for at least two minutes to remove trapped air from the water line and to fill the water system. To flush out impurities in the water line, throw away the first six glassfuls of water.

This system conforms to NSF/ANSI 42 for the reduction of Chlorine, Taste and Odor, as verified and substantiated by test data. The concentration of the indicated substances in water entering the system was reduced to a concentration less than or equal to the permissible limit for water leaving the system, as specified in NSF/ANSI 42.

The system and installation shall comply with applicable state and local regulations.

Substance	Influent Challenge Concentration	Reduction Requirements/ Max. Permissible Product Water Concentration	Average % Reduction
Chlorine	2.0 mg/L	50%	75.7%
