

# MODEL QTRE100S HUMIDITY SENSING FAN

**A modern-styled, high performance fan, with sensing circuitry, that “knows” when to ventilate the room.**

### FEATURES

#### BLOWER:

- Plug-in, permanently lubricated motor - engineered for continuous operation
- Dynamically balanced centrifugal blower wheel for quiet, efficient performance
- Maintains a high percentage of rated CFM in less than ideal installations
- Low RPM for quiet operation
- Resilient anti-vibration motor mounts

#### HOUSING:

- Rugged, 26 gauge, galvanized steel construction
- 4” round ducting for superior performance
- Polymeric duct connector with tapered sleeve and no metallic clatter
- 7-5/8” height allows for 2” x 8” (nominal) joist installations
- Sturdy, easy, four-point mounting directly to joist
- Includes unique spacer (patent pending) for mounting to engineered “I” joists
- Includes hanger bars to position housing anywhere between 16” to 24”-on-center joists
- Two sets of mounting holes for hanger bars allow flush installation with bottom or top of drywall

#### GRILLE:

- Polymeric construction
- Innovative design - the result of extensive research with designers and consumers

#### AUTOMATIC CONTROL:

- Humidity control automatically turns fan ON when either of these conditions is detected:
  - a rapid to moderate increase of humidity
  - humidity above factory set-point
- Two wire manual operation for odor control - Turns fan ON when power line through wall switch is cycled ON, OFF and back ON
- Remains ON for 20 minutes after humidity has stabilized and is below factory set-point or after manually initiated through power line cycling
- Saves energy because unit runs only for the time required. A unit controlled with a wall timer may keep fan ON longer than required or turn it OFF before room is sufficiently ventilated

#### CONTROLS (Purchase separately):

- Refer to Broan’s catalog for a complete line of accessories to effectively adapt these fans to your construction requirements

U.L. Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit (ceiling mount only).

3-Year Warranty

## TYPICAL SPECIFICATION

Ceiling Ventilator shall be Broan Model QTRE100S.

The unit will have a control that will automatically turn fan ON when humidity increase is rapid to moderate, or when humidity is higher than factory set-point, or when supply power is cycled from ON (for more than a second) to OFF (for less than a second) and back ON. It shall turn OFF 20 minutes after humidity has stabilized and is below factory set-point, or after manually initiated by supply power cycling.

Ceiling Ventilator shall have corrosion resistant galvanized steel housing with four-point mounting capability. It shall be ducted to a roof or wall cap using 4" round ductwork.

Blower assembly shall be removable, have a centrifugal-type blower wheel and a permanently lubricated motor designed for continuous operation and mounted with resilient anti-vibration mounts.

Non-metallic damper/duct connector shall be included.

Air delivery shall be no less than 100 CFM and sound level no greater than 1.5 Sones. All air and sound ratings shall be certified by HVI.

Ceiling Ventilator shall be Energy Star® qualified and have an energy efficient permanent split capacitor motor.

Ceiling Ventilator shall be U.L. Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit.

## PERFORMANCE RATINGS MODEL QTRE100S VENTILATOR

### HVI PERFORMANCE

Model	Sones @0.1" Ps	CFM @0.1" Ps
QTRE100S	1.5	100

HVI-2100 CERTIFIED RATINGS comply with new testing technologies and procedures prescribed by the Home Ventilating Institute, for off-the-shelf products, as they are available to consumers. Product performance is rated at 0.1 in. static pressure, based on tests conducted in a state-of-the-art test laboratory. Sones are a measure of humanly-perceived loudness, based on laboratory measurements.
