

## The perfect time for energy savings.

Conserve energy and save money with P&S Timers. And get the quality, performance and functionality you've come to expect from P&S. Businesses and homeowners are going green and looking for ways to reduce energy consumption. Our timers are a simple, effective solution that makes saving energy easy. People forget, but our timers always remember!

P&S Timers add convenience in other ways, too. They provide simple, intuitive operation. And illuminated models are available, making it easy to find a control in the dark.

The P&S Timer line offers all the choices you need to meet any residential or commercial requirement. That includes models with 20-Amp capacity — enough to operate many types of fans and pumps — plus mechanical and digital models that handle up to 600 Watts of lighting and multiple lighting types (incandescent, fluorescent and low-voltage). You can select models with time delays from 15 minutes up to 12 hours. Now's the time to make energy savings automatic.

Style,  
efficiency, and  
convenience.

RT1-W

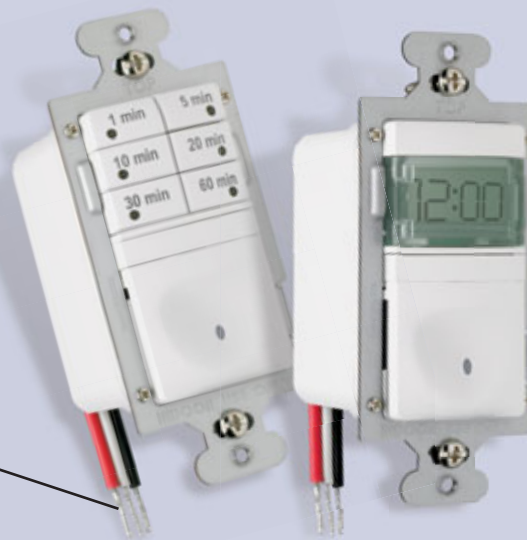

**Pass & Seymour**

**Controls most types of lighting** — including incandescent, fluorescent (including compact fluorescent) and both magnetic and electronic low-voltage loads.

**Quality construction** — ensures dependability and a long service life.

**Fast, easy installation** — via pre-stripped leads.

**Handles up to 600W and 1/6 horsepower motor loads** — ideal for bathroom fans, heat lamps, and most lighting applications.

**Smooth, contemporary design** — a great fit in any décor.
