

CABIN AIR FILTER REPLACEMENT

Recommended Replacement Interval: 15,000 miles under normal operating conditions.

NISSAN ALTIMA 2.5L '14-'13, PATHFINDER '14-'13, INFINITI JX35 '13, QX60 '14

Installation Time: More than 10min

Tools needed: may need needle nose pliers to extract

Location: Under the glove compartment

1. Locate cabin air filter access door, located under the glovebox on the passenger side. Unlatch door by pushing tab up and sliding downward.
2. Remove the filter from the housing, by starting at bottom pinch the corner and pull filter downward and out. Please make note of orientation.(may need pliers to remove)
3. Take new filter and pinch down the sides with more flexibility, use this orientation when placing into the housing.
4. With the sides of the filter pinched down, start working the filter into the housing, use upward force to ensure the filter forms into place inside housing.
5. Reassemble in reverse order.
