

CABIN AIR FILTER REPLACEMENT

Recommended Replacement Interval: 15,000 miles under normal operating conditions.

FORD EXPLORER, FLEX, TAURUS (MKS, MKT) '15-'10

Installation Time: 10min

Tools needed: none

Location: Behind the glove box

1. Remove the two hinge pins underneath the glove compartment.
2. Unhook the dampening cord from the right side of the glove compartment.
3. Remove glove compartment.
4. Locate cabin air filter access door and remove by pressing the two tabs simultaneously.
5. Remove the filter from the housing, making note of orientation.
6. Install the new filter and reassemble in reverse order.
