

Introducing the Retro Damper™

This new, low cost retrofit zone control damper makes it easy for you to quickly add zone control to an existing home. No more having to remove a section of duct to install the round zone damper, now you can ...

“Just cut a slot and slide it in!”

Many homeowners today are willing to invest a significant amount of money in their home, especially on indoor air quality and temperature control. The Retro Damper™ will give you an edge over the competition, allowing you to sell more at a higher gross margin.

Retro Damper™ is the perfect alternative to expensive pneumatic systems that require special plastic tubing and pumps. The Retro Damper™ uses every-day thermostat wire and will work with almost any zone control panel. Plus, the Retro Damper™ is backed by one of the leading zone control manufacturers in the industry, Jackson Systems.

Please call toll-free at 888-652-9663 today to place an order or to request additional information! You can also check us out online at www.jacksonsystems.com.
